Public service

We are here to serve the public with the highest level of integrity.

Excellence

We aspire to achieve exceptional results

Teamwork

We engage others in ways that foster respect and trust.

Respect

We encourage and appreciate diversity in people and ideas.

Innovation

We take pride in coming up with innovative solutions.

Sustainability

We are leaders in demonstrating resource use and protection.

Metro's values and purpose

We inspire, engage, teach, and invite people to preserve and enhance the quality of life and the environment for current and future generations.

Metro respects civil rights

Metro fully complies with Title VI of the Civil Rights Act of 1964 that requires that no person be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination on the basis of race, color or national origin under any program or activity for which Metro receives federal financial assistance.

Metro fully complies with Title II of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act that requires that no otherwise qualified individual with a disability be excluded from the participation in, be denied the benefits of, or be subjected to discrimination solely by reason of their disability under any program or activity for which Metro receives federal financial assistance.

If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age, or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit oregonmetro.gov/civilrights or call 503-797-1536.

Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1700 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. For up-to-date public transportation information, visit TriMet's website at trimet.org.

Metro is the federally mandated metropolitan planning organization designated by the governor to develop an overall transportation plan and to allocate federal funds for the region.

The Joint Policy Advisory Committee on Transportation (JPACT) is a 17-member committee that provides a forum for elected officials and representatives of agencies involved in transportation to evaluate transportation needs in the region and to make recommendations to the Metro Council. The established decision-making process assures a well-balanced regional transportation system and involves local elected officials directly in decisions that help the Metro Council develop regional transportation policies, including allocating transportation funds. JPACT serves as the MPO board for the region in a unique partnership that requires joint action with the Metro Council on all MPO decisions.

MTIP web site: oregonmetro.gov/mtip

The preparation of this report was financed in part by the U.S. Department of Transportation, Federal Highway Administration and Federal Transit Administration. The opinions, findings and conclusions expressed in this report are not necessarily those of the U.S. Department of Transportation, Federal Highway Administration and Federal Transit Administration

What is Metro?

Metro works with communities, businesses, and residents in the Portland metropolitan area to chart a wise course for the future while protecting the things we love about this place.

Where is Metro?

Metro serves more than 1.5 million people in Clackamas, Multnomah, and Washington counties. The agency's boundary encompasses Portland, Oregon and 23 other cities – from the Columbia River in the north to the bend of the Willamette River near Wilsonville, and from the foothills of the Coast Range near Forest Grove to the banks of the Sandy River at Troutdale.

Who is Metro?

The Metro Council consists of a president, elected region wide, and six councilors who are elected by district every four years in nonpartisan races. The Metro Auditor, elected region wide, is responsible for oversight of Metro's annual financial statements and for conducting performance audits. The council appoints a chief operating officer to carry out council policies and manage Metro operations. The chief operating officer oversees a diverse workforce of more than 1,600 employees including park rangers, economists, teachers, scientists, designers, planners, animal keepers, stagehands and cartographers. Hundreds of volunteers lend a hand at Metro's parks, cemeteries, natural areas, offices, and visitor venues.

Metro is the Metropolitan Planning Organization (MPO) for the Portland region

A metropolitan planning organization is a federally mandated and federally funded transportation policy-making organization for urbanized areas with a population greater than 50,000. Made up of representatives from local government and transportation authorities, MPOs ensure regional cooperation in transportation based on a continuing, cooperative, and comprehensive ("3C") planning process. As the MPO for the Portland metropolitan area, Metro is authorized by Congress and the State of Oregon to coordinate and plan investments in the transportation system for the three-county metropolitan planning area. Metro uses this authority to expand transportation options, make the most of existing streets and improve public transit service.

Metro works collaboratively with cities, counties and transportation agencies to decide how to invest federal highway and public transit funds within its service area. It creates a long-range transportation plan (RTP), a 4 year transportation funding program (MTIP), and leads efforts to expand the public transit system and helps make strategic use of a small subset of transportation funding that Congress designates MPOs allocate to projects.

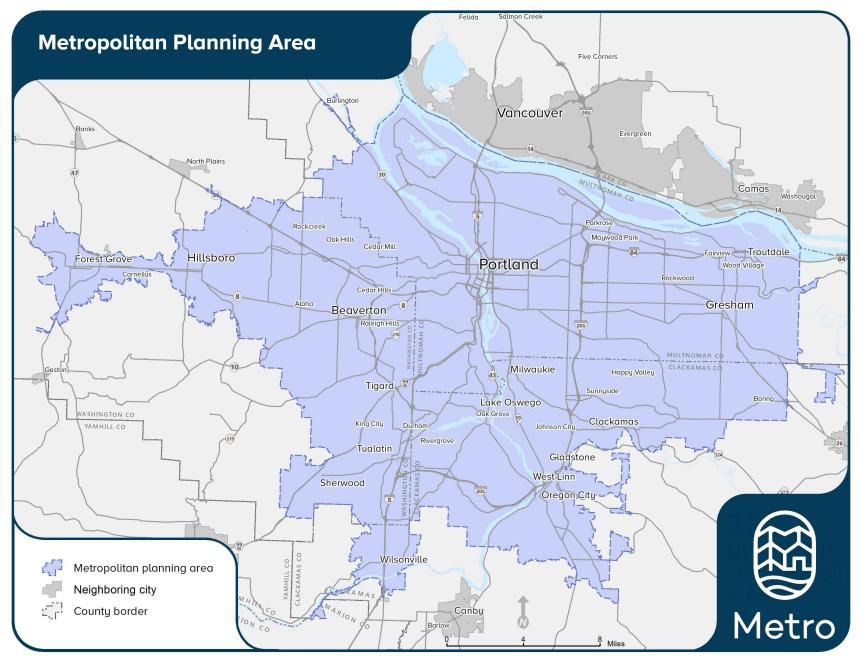

Figure 1. Metropolitan Planning Area map

Regional Transportation Plan (RTP)

The Regional Transportation Plan is a blueprint to guide investments for all forms of travel – motor vehicle, transit, bicycle, and walking – and the movement of goods and freight throughout the Portland metropolitan region. The plan identifies current and future transportation needs, investments needed to meet those needs and what funds the region expects to have available over the next 25 years to make those investments a reality. The RTP is the guiding policy document which outlines the long- range vision of the region's urban transportation system. As a component of the policy document, it identifies priority transportation investments (i.e., projects and programs) which will help achieve the long-range vision. The RTP list represents priorities beyond what can be afforded by the region in any given year. As a result, Metro is required to develop a four-year expenditure plan known as the Metropolitan Transportation Improvement Program (MTIP) for the Portland urban area for projects to receive federal transportation funding, they must be included in the financially constrained Regional Transportation Plan.

Metropolitan Transportation Improvement Program (MTIP)

The Metropolitan Transportation Improvement Program is the federally mandated four- year schedule of expenditures (i.e., spending) of federal transportation funds as well as significant state and local funds in the Portland metropolitan region. As a report, the MTIP provides the upcoming four-year implementation schedule of transportation projects in the Portland region. The MTIP also demonstrates how the transportation projects to be implemented comply with federal regulations regarding project eligibility, air quality impacts, environmental justice, and public involvement. The MTIP serves as the implementation strategy for the first four years of the region's long-range transportation plan (RTP). The MTIP coordinates spending of federal and state transportation funds for four different public agencies: Metro, the Oregon Department of Transportation (ODOT), Tri- County Metropolitan Transportation District (TriMet), and South Metro Area Regional Transit (SMART).

Programming in the MTIP is based on a forecast of revenues expected to be available through annual appropriations and apportionments of federal transportation funds. Forecasted revenues are assigned to estimated costs by project phase, such as design and engineering, right- of-way acquisition, and construction. As funding becomes available each federal fiscal year, programming is adjusted for that year based on project readiness, with some projects slipping to future years while others move to the current year. Projects in this report are also in the MTIP.

Annual Listing of Obligated Projects

The 2024 Annual Listing of Federally Obligated Projects lists the Metro area programs and projects for which Federal transportation funds have been obligated. The programs and projects listed in this report are located within the Portland metropolitan planning area boundary, representing 24 cities and 3 counties (see Figure 1). The obligation lists are organized by lead agency which can be a city, county, state (ODOT), transit authority (TriMet or SMART), Metro or any other agency authorized to receive federal transportation funds.

This report provides a yearly update about the progress of projects scheduled for construction or implementation and is useful for understanding the process by which federal investments are made in the communities of this region.

Table 3 lists the projects obligated through the Federal Highway Administration (FHWA) and is sorted by

Lead Agency. Table 4 lists projects obligated through FHWA and is sorted by Federal Fund Source. Table 5 lists projects obligated through The Federal Transit Administration (FTA).

This document is available for download on the Metro website at: www.oregonmetro.gov/mtip.

About Obligations

An obligation in the context of this report is the Federal government's legal commitment to pay the Federal share of a project's cost. An obligated project is one that has been authorized by the Federal agency as meeting eligibility requirements for federal funds.

For FTA projects, obligation occurs when the FTA grant is awarded. For FHWA projects, obligation occurs by phase when a project agreement is executed and FHWA authorizes the federal funds. A project agreement defines specific project elements that are eligible for funding; how financing will occur; and agency roles, responsibilities, and liabilities.

Once funds have been obligated, the project sponsor/lead agency begins incurring eligible project expenses and then requests reimbursement. The reimbursement request must demonstrate that the recipient incurred the costs consistent with the project agreement and all federal requirements.

Installed the concrete panel tub at crossing, photo courtesy of TriMet

Projects for which funds have been obligated are not necessarily initiated or completed in the program year. For obligations on a construction project, typically the project needs to complete a competitive bid process and begin construction (if an acceptable bid is received) before receiving reimbursement of project costs with federal funds. Alternatively, projects may have obtained permission to proceed to construction using local funds, with the ability to be obligated and reimbursed with federal funds at a later date. Some of those projects in this report may already have been constructed.

The amount of the obligation usually does not equal the total cost of the project. An obligation may be for only one phase of a multi-phased project, and the obligation amount listed does not account for local funding spent on a project. The total estimated cost of the project is included in the report for reference.

Occasionally, an agency may request that funds be "de-obligated" from a project. This occurs most frequently when the sponsor agency has completed the phase of a project without using all the obligated funds. It also occurs if the agency has decided not to proceed with that project or if an agency decides to change sources of funding for a project. In the case of changing categories of funds, there may be a report entry showing the obligation of the second funding category to the project. De-obligations are shown on the obligation table in parenthesis ().

Following are the funding charts, graphs and projects in the Portland metropolitan area that were obligated in Federal Fiscal Year 2024 (October 1, 2023 – September 30, 2024).

For further information on these fund types: http://www.fhwa.dot.gov/federalaid/projects.cfm

FFY 2024 Obligation Summary

Federal Transportation Funds

A total of approximately \$147 million in federal program funds were obligated in federal fiscal year 2024 on 84 projects within the Portland metropolitan region. Funds from the Federal Highway Administration (FHWA) accounted for 39% of the total and approximately \$58 million on 70 projects. Funds from the Federal Transit Administration (FTA) accounted for 61% of the total and approximately \$90 million on 14 projects. The table and chart below show fund amounts and percentages in more detail.

Table 1. FFY 2024 Obligation of Federal Transportation Funds by Program

| Obligation of Fe | ederal Tra | ansportation Funds | |
|---------------------------------|------------|--------------------|------------------|
| Federal Fund Program | 2024 | Funds Obligated | Percent of Total |
| CMAQ-Tech | \$ | 15,147.93 | 0.01% |
| CMAQ-Urban | \$ | 12,883,350.00 | 8.73% |
| CRP-Urban | \$ | 846,349.62 | 0.57% |
| FTA Section 5307 | \$ | 54,010,256.00 | 36.60% |

| STBG-State | \$ | 20,411,908.20 | 13.83% |
| STBG-Urban | \$ | 32,284,053.41 | 21.87% |
| TA/TAP-Urban | \$ | 3,070,781.98 | 2.08% |
| TAP-Small Urban | \$ | (2,539.89) | 0.00% |
| TIFIA | \$ | 125,474.24 | 0.09% |
| Grand Total | \$ | 147,584,716.35 | 100.00% |

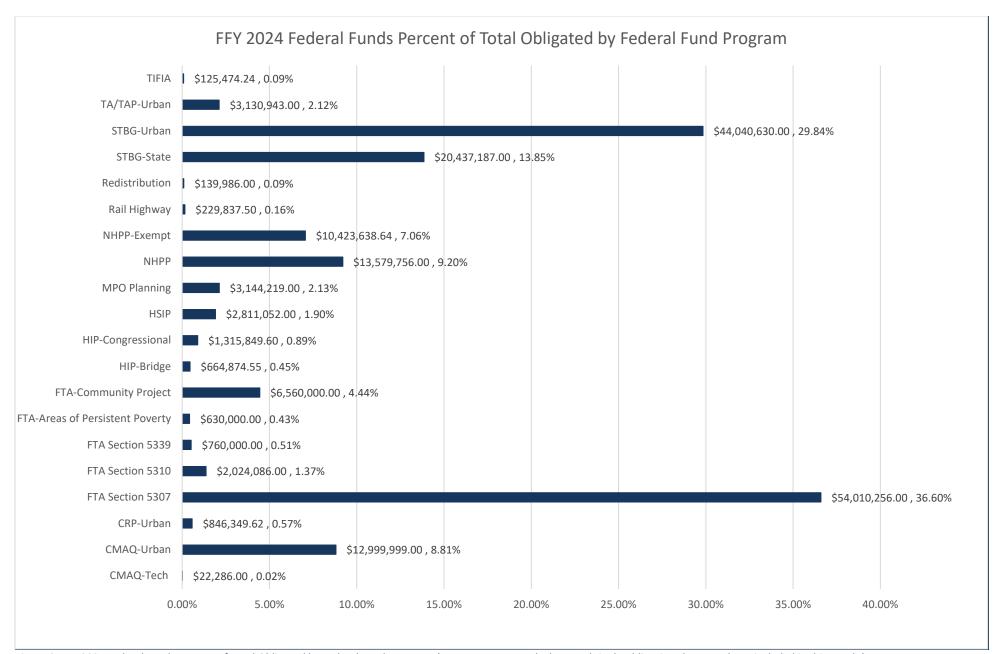

Figure 2. FFY 2024 Federal Funds Percent of Total Obligated by Federal Fund Program. (Note: Program totals that result in de-obligations have not been included in this graph.)

Federal funds from FHWA help fund major bridge and highway projects in the Portland metropolitan area. There are also many local transportation projects that are partially funded by FHWA and FTA. Local projects include active transportation projects such as on-street bicycle and pedestrian improvements as well projects that support safety, access to transit, trails, freight movement and economic development initiatives.

Of the obligated FTA funds, approximately 60% are programmed for vehicle preventive maintenance and purchase of equipment for bus and rail, 25% are for High-Capacity Transit projects, 8% construction projects, and the remaining 7% include Regional Travel Options, planning, safe route to school projects, and projects to enhance mobility of seniors and individuals with disabilities. The program fund source of these projects includes FTA's annual formula grants, competitive grants, and transfer funds from FHWA's STBG-Urban and CMAQ-Urban programs.

Mechanic working on bus engine maintenance. Photo curtesy of SMART.

Annual Obligations vs. Historical Obligations

A total of approximately \$148 million in federal program funds were obligated in FFY 2024 which follows recent decrease trend from the FFY 2023 obligations which totaled \$152 million. There was an overall total decrease of 3% in FHWA and FTA obligated funds. This is consistent with the decrease observed from FFY 2022 to FFY 2023 obligations.

The FTA program saw an increase of 87%, approximately \$41 million, this last year. This increase is largely caused by Section 5307 formula funds, normally used to pay for preventive maintenance costs each year, which were deferred to FFY 2024 to continue using the American Rescue Plan Act (ARPA) funds until they were drawn down completely. Although there was an increase, the transit funding originally programmed for FFY 2024 has not fully obligated due to delays in receiving updated UZA balances. Transit agencies such as TriMet, SMART, and CTRAN received a revised UZA formula appropriation near the end of the year. As a result, additional transit formula funded projects had to move to FFY 2025 to allow approval through FTA's Transit Award Management System.

The FHWA obligations also decreased in FFY 2024, \$46 million less than 2023. There are several factors that have contributed. Inflation continues impact significantly with project delivery and the ability for projects to obligate on schedule. As Metro, ODOT and the local agencies continue to work to address increase in costs, projects have been moved to FFY 2025 to address funding shortfalls, however the federal obligations are delayed as a result. Additional causes include delays in the Grant Agreement processes for direct discretionary funding, agencies workload and resource shortages, and an overall decrease in revenues available in FFY 2024.

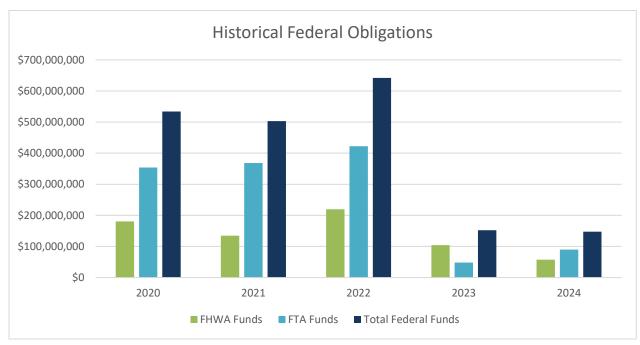

Figure 3. Historical Federal Obligations (FFY 2020-2024)

Regional Flexible Funds

Metro allocates the local federal highway program funds, referred to as the Regional Flexible Fund Allocation (RFFA). The urban federal program funds include Surface Transportation Block Grant Program (STBG), formerly Surface Transportation Program (STP), Congestion Mitigation and Air Quality Program (CMAQ) and Transportation Alternatives Program (TA, formerly TAP). A total of approximately \$49 million in regional flexible funds were obligated in federal fiscal year 2024 on 42 projects within the Portland metropolitan region. Funds from the STP/STBG Program accounted for 66%. Funds from the CMAQ Program accounted for 26%, 6% were TA/TAP Program funds, and 2% of the funds allocated were Carbon Reduction Program (CRP) funds. The table and chart below show fund amounts and percentages in more detail.

Table 2. Metro RFFA Funds MTIP Report and FMIS Obligation

Notes: 2024 Limitation amounts and Prior Year Carryover amounts from ODOT's STIP Financial Plan Detail Report

The annual obligation amounts can exceed annual programming when new obligations are made on project phases from prior years.

Programming totals from FY24-27 MTIP Report of 8/31/24 (End of federal fiscal year) Obligations from FFY 2024 FMIS Obligation Report

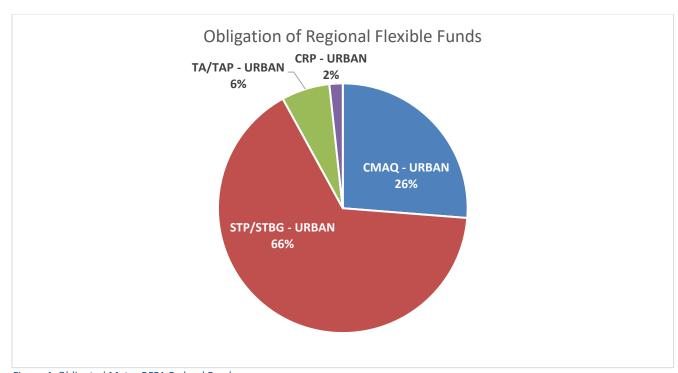

Figure 4. Obligated Metro RFFA Federal Funds

Advance Construction

Advance construction (AC) allows states to begin a project even in the absence of sufficient Federal-aid obligation authority at a particular point in time to cover the Federal share of project costs. The Federal Highway Administration can approve use of AC and the ability of a project to proceed as eligible to receive reimbursement from federal fund sources if all other federal requirements for obligation have been met and the state DOT anticipates use of future obligation funding authority for use on that project.

Prior to Federal authorization of a project as AC, the project must be included in the Federally approved STIP/TIP [see 23 CFR 630.705]. The project will support the fiscally constrained element of the STIP/TIP using all or some combination of State, local, and/or private funds. The financial limit on the amount of AC is set by the State's or MPO's ability to demonstrate fiscal constraint. Consideration should be given to the future availability of Federal-aid funds to accommodate the AC conversion.

Generally, when an AC project is converted to a federally funded project, the STIP/TIP will document the full or partial conversion of this project. The amount of conversion is limited to the apportioned Federal-funds available in the category. As with any project, the State is not locked into the category of funds identified in the approved STIP/TIP. If the approved AC "conversion" substantially changes the current STIP/TIP's fiscal constraint determination, the STIP/TIP's will need to be amended. The fiscal constraint determination should be based on the individual, or group of project conversions, or the total amount and source(s) of Federal funds which are presented within the STIP/TIP.

NE 82nd MAX Station Shelter, Photo courtesy of TriMet

When the state DOT AC's a project, they are committing state, local, or private funds on the project up front so the project can commence until federal funds are available. When federal funds become available, the AC designation is converted to an eligible federal fund type. This typically happens 3-12 months after receiving designation as AC.

In federal fiscal year 2024, the Oregon Department of Transportation (ODOT) utilized Advance Construction for 10 projects in the Portland Metropolitan area. Those obligations totaled \$126,765,710. We have incorporated an Advance Construction Listing (Table 6) to show which projects and funds were impacted. These AC funded obligations will eventually convert to federal funds and reported in the FFY 2025 Annual Listing of Obligated projects.

Further information

For additional information regarding specific projects contained within this report, please contact the project sponsor.

Data Field Definitions

| The County(s) in which the project is located. | | |
|--|--|--|
| This is a surject identification of the property of the composition of | | |
| This is a unique identification number assigned to a program or project by the MPO (Metro) to organize all transportation projects within the Metropolitan Transportation Improvement Program (MTIP). | | |
| The agency responsible for leading the delivery of the project. | | |
| This is a unique identification number assigned to a program or a project by the ODOT to organize all transportation projects within the State Transportation Improvement Program (STIP). | | |
| The type of work being completed on the project with funds programmed | | |
| for the fiscal year identified. Includes: Planning: activities associated with preparing projects for implementation, from broad systems planning to project | | |
| development activities.Preliminary engineering: work to create | | |
| construction and environmental documents. | | |
| Right of way: activities associated with investigating needs for use of land for the construction or operation of a project. | | |
| Construction: activities associated with the physical construction of a project. | | |
| Other: Activities for programs or projects not defined by one of the other phase activities defined above. | | |
| Identifies four-year MTIP cycles and three-year CFP cycles. | | |
| Identifies the MTIP actions (drafts, adoptions, and amendments) associated with the current project records. | | |
| In general, project descriptions address the following: | | |
| Where a project is located (if not included in the project name) What the project will be doing o Which funding program (as applicable) When (as applicable) | | |
| Why we are doing the project (what benefits will the public receive) | | |
| A project name's main goal is to identify where it is taking place or to provide a general description of the work to be done. | | |
| Used to categorize projects at the highest level (type, category, feature) to distinguish the mode and feature attributes of a transportation project. Roadway: projects located on the arterial, collector or local street systems and serve/benefit motor vehicle capacity or function, unless the roadway motor vehicle elements are ancillary to a Transit, Active Transportation, or Other project type. Highway: projects located on the Throughway system and serve/benefit motor vehicle capacity or function, unless the motor vehicle elements are ancillary to a Transit, Active Transportation, or Other project type. Transit: projects to primarily implement a public transportation | | |
| | | |

| DEEA ID | function. Active Transportation/Complete Streets: projects to primarily implement elements that support people utilizing non-motor vehicle modes such as walking, rolling, and bicycling. Planning: activities that support the planning of the transportation system. Does not include project development activities. Other: for any project that does not fit one of the above types, including projects/programs that are primarily TDM, TSMO, TOD or Freight Rail type. |
|------------------------------|--|
| RFFA ID | This is the 5-digit Regional Flexible Funds Allocation (RFFA) project identification number assigned by Metro when applications are submitted during the Call For Projects (CFP) cycle (5****). |
| Road/Route Name | This field is populated by ODOT and used for US Numbered Highway designation (e.g., US 30), Interstate designation (e.g., Interstate 205) or State Highway designations (e.g., OR 8). |
| RTP ID | This is a unique identification number assigned to a program or project by the MPO (Metro) to organize all transportation projects within the long-range Regional Transportation Plan. |
| System Investment Type | This is a different way to categorize projects and "roll-up" into types that allow them to be distinguished by whether they are providing a new/expanded facility, preservation of an existing facility, operating or improving the functionality of an existing facility/service, or planning for the transportation system. Single select menu options: Capital project: Projects that are providing new modal capacity or functionality to the transportation system. Preservation & Maintenance (Asset Management): Projects whose primary purpose is to restore or maintain existing assets and functionality of the transportation system. System Management & ITS: Projects or activities that are improving the functionality and/or performance of the existing transportation network but not providing a new mode to the system. Includes projects such as the deployment of technology to improve system performance or safety, tools to provide information to travelers about system conditions, and agreements for cooperative multiagency operation of system assets. Operations: Projects, programs, or funding bucket whose function is the operation of transit services or the roadway network. Planning: System, Corridor, or Pre-NEPA project activities to evaluate and define transportation system and project needs, including modal type and general location. Other |
| Total Cost | The total amount of federal, state, and local funding programmed and made available to each project. |
| Year | The programming year is the federal fiscal year funds are expected to be available for the project. |
| YOE\$ | All funds programmed in the MTIP are represented in year of expenditure (YOE) dollars. |

Glossary of Terms

| All Roads Transportation Safety (ARTS) | Formerly known as the Jurisdictionally Blind Safety Program, is an Oregon Department of Transportation Program that is designed to address safety needs on all public roads in Oregon. The program's goals are to: • Increase awareness of safety on all roads; • Promote best practices for infrastructure safety; • Complement behavioral safety efforts; • Focus limited resources to reduce fatal and serious injury crashes in the state of Oregon. The program is data driven to achieve the greatest benefits in crash reduction and is blind to jurisdiction. |
|---|---|
| Fixing America's Surface Transportation Act (FAST Act) | A funding and authorization bill to govern United States federal surface transportation spending, signed by President Obama on December 4, 2015. The FAST Act established funding levels and federal policy for our nation's highways and public transit systems for fiscal years 2016-2020. The \$305 billion, five-year bill maintains the core highway and transit funding programs established by its predecessor MAP-21, and establishes the National Highway Freight Program, a formula program focused on goods movement. |
| Federal Highway Administration (FHWA) | The U.S. Department of Transportation agency responsible for administering the federal highway aid program to individual states, and helping to plan, develop and coordinate construction of federally-funded highway projects. FHWA also governs the safety of hazardous cargo on the nation's highways. The FHWA implements transportation legislation approved at the congressional level that appropriates all federal funds to states, MPOs and local governments. |
| Intelligent transportation systems (ITS) | Electronics, photonics, communications, or information processing used singly or in combination to improve the efficiency or safety of the transportation system. ITS can include both vehicle-to-vehicle communication (which allows cars to communicate with one another to avoid crashes and vehicle-to-infrastructure communication (which allows cars to communicate with the roadway) to identify congestion, crashes or unsafe driving conditions, manage traffic flow, or provide alternate routes to travelers. |
| Level-of-service (motor vehicle network) | A traditional measure of congestion, calculated by by dividing the number of motor vehicles passing through a section of roadway during a specific increment of time by the motor vehicle capacity of the section. For example, a LOS of 1.00 indicates the roadway facility is operating at its capacity. Traditionally, motor vehicle LOS has been used in transportation |
| | system planning, project development and design as well as in |

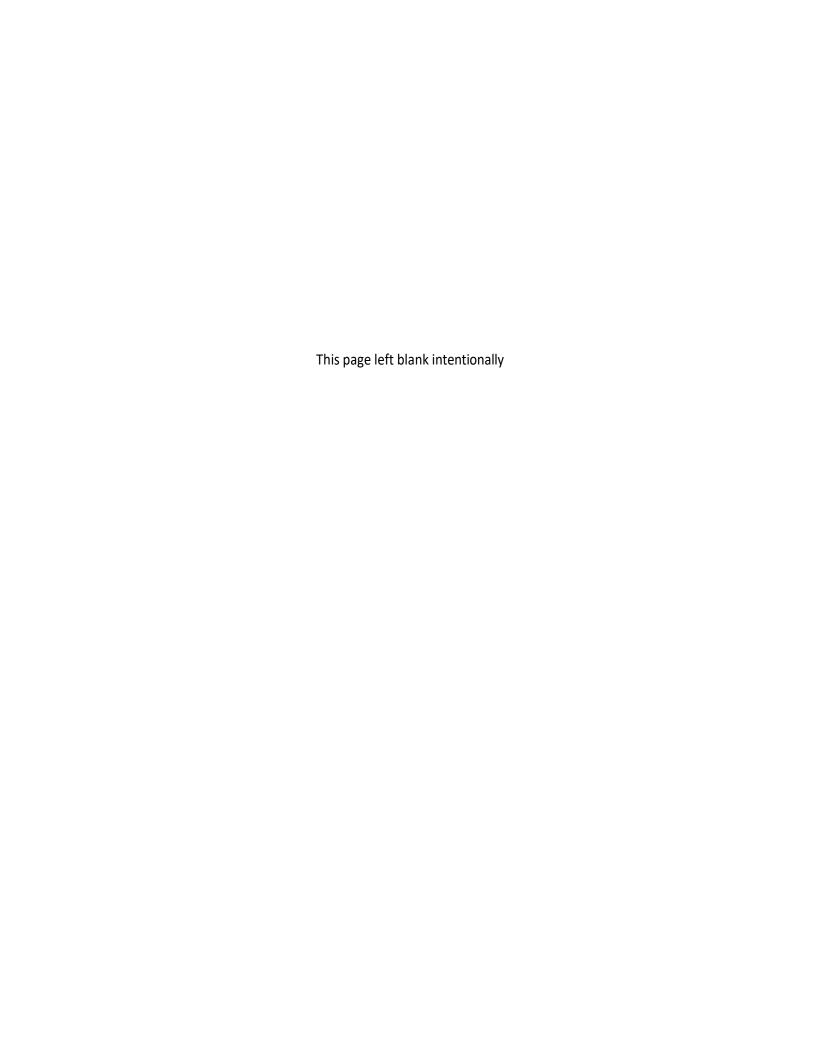

| | appretional analysis and traffic analysis conducted during the |
|-----------------------------|--|
| | operational analyses and traffic analysis conducted during the |
| | development review process. As a system plan, the RTP uses the |
| | interim regional policy to diagnose the extent of motor vehicle |
| | congestion on throughways and arterials during different times of the |
| | day and to determine adequacy in meeting the region's needs. LOS is |
| | also used to determine consistency of the RTP with the Oregon |
| | Highway Plan for state-owned facilities. See also volume-to-capacity |
| | ratio and regional mobility policy. |
| | A federally-required policy body responsible for the transportation |
| | planning, project selection and scheduling the use of federal |
| | transportation funds in its region. Governed by policy board, MPOs are |
| | required in urbanized areas with populations more than 50,000 and are |
| | designated by the governor of the state. Oregon currently has eight |
| | MPOs covering the metropolitan areas of Portland, Salem-Keizer, |
| Metropolitan | Corvallis area, Eugene-Springfield, Rogue Valley (Medford-Ashland,) |
| Planning Organization (MPO) | Bend area, Albany area, and Middle Rogue. JPACT and the Metro Council constitute the MPO for the Portland region. The MPO conducts |
| Organization (MPO) | federally mandated transportation planning work, including: a long- |
| | range Regional Transportation Plan (RTP), the Metropolitan |
| | Transportation Improvement Program (MTIP) for capital improvements |
| | identified for a four-year construction period, a Unified Planning Work |
| | Program (UPWP), a congestion management process (CMP), federal |
| | performance-based planning and target-setting and conformity to the |
| | state implementation plan for air quality for transportation related |
| | emissions. |
| | The MTIP includes all federally funded transportation projects in the |
| | Portland metropolitan planning area, including projects planned by |
| Metropolitan | TriMet, the Oregon Department of Transportation and local agencies |
| Transportation | receiving federal funds allocated by Metro. The MTIP is incorporated in |
| Improvement | the Statewide Transportation Improvement Program (STIP), which |
| Program (MTIP) | identifies the state's four-year transportation capital improvements. |
| | See also transportation improvement program. |
| | Title 23 of the U.S. Code section 103 states that the purpose of the NHS |
| | is to provide an interconnected system of principal routes that serve |
| | major population centers, international border crossings, ports, |
| National Highway | airports, public transportation facilities, intermodal transportation |
| System (NHS) | facilities, major travel destinations, meet national defense |
| | requirements, and serve interstate and inter–regional travel. Facilities |
| | included in the NHS are of regional significance. |
| | A phase in the transportation planning process during which a |
| | proposed project undergoes a more detailed analysis of the project's |
| | social, economic and environmental impacts and various project |
| | alternatives to determine the precise location, alignment, and |
| Project | preliminary design of improvements based on site-specific engineering |
| Development (PD) | and environmental studies. After a project has successfully passed |
| | through this phase, it may move forward to right–of–way acquisition |
| | and and phades, termay interest returns to right of way adquisition |

| | , |
|---|---|
| | and construction phases. Project development activities include: Environmental Assessment (EA)/Environmental Impact Statement (EIS) work, Design Options Analysis (DOA), management plans, and transit Alternatives Analysis (AA). |
| Right-of-way (ROW) | Land that is publicly-owned, or in which the public has a legal interest, usually in a strip, within which the entire road facility (including travel lanes, medians, sidewalks, shoulders, planting areas, bikeways and utility easements) resides. The right-of-way is usually acquired for or devoted to multi-modal transportation purposes including bicycle, pedestrian, public transportation and vehicular travel. |
| | Metro program guided by a five-year strategic plan aimed at reducing the demand for roadway travel, particularly single occupant vehicle travel. More specifically, Metro's RTO program includes: • a coordinated education and outreach effort to efficiently use |
| | public dollars to reach key audiences an employer outreach program to save employers and employees money |
| Regional Travel Options (RTO) Program | a regional Safe Routes to School effort that supports local education programs in schools to teach kids how to walk and bicycle to school safely |
| | a regional rideshare program that makes carpooling safer and easier and helps people with limited transit access have options to get around |
| | a grant program that funds partner efforts, such as The Street Trust's Bike Commute Challenge, TriMet's and TMA's work with employers, Ride Connection's RideWise travel training program for seniors and people with disabilities, and Portland Sunday Parkways, to name a few |
| | funding for bicycle racks, wayfinding signage and other tools that help people to walk and bicycle |
| | funding for pilot projects to test new ways to reach the public through technology or innovative engagement methods. |
| Regional Transportation Plan (RTP) | A long-range metropolitan transportation plan that is developed and adopted for the greater Portland metropolitan planning area (MPA) covering a planning horizon of at least 20 years. Usually RTPs are updated every five years through the federally-mandated metropolitan transportation planning process. The plan identifies and analyzes transportation needs of the metropolitan region and creates a framework for implementing policies and project priorities. Required by state and federal law, it includes programs to better maintain, operate |
| | and expand transportation options to address existing and future transportation needs. The RTP also serves as the regional |

| | transportation system plan under the Oregon Transportation Planning Rule. |
|--|---|
| Surface Transportation Block Grant (STBG) | A federal source of funding for projects and activities that is the most flexible in its use. Projects and activities which states and localities can use STBG include: projects that preserve and improve the conditions and performance on any federal-aid highway, bridge and tunnel projects on any public road, pedestrian and bicycle infrastructure and transit capital projects, including intercity bus terminals. |
| State Transportation Improvement Program (STIP) | The four-year funding and scheduling document for major street, highway and transit projects in Oregon. The STIP is produced by ODOT, consistent with the Oregon Transportation Plan (the statewide transportation plan) and other statewide plans as well as metropolitan transportation plans and MTIPs. The STIP covers the entire state and is overseen by the Oregon Transportation Commission (OTC). It must include all the metropolitan region's TIPs without change as well as a list of specific projects proposed by ODOT in the non-metropolitan areas. Updated every three years, the STIP determines when and if transportation projects will be funded by the state with state or federal funds. |
| Transportation Alternatives Program | The Transportation Alternatives Program (TAP) was authorized under Section 1122 of Moving Ahead for Progress in the 21st Century Act (MAP-21) and is codified at 23 U.S.C. sections 213(b), and 101(a)(29). Section 1122 provides for the reservation of funds apportioned to a State under section 104(b) of title 23 to carry out the TAP. The national total reserved for the TAP is equal to 2% of the total amount authorized from the Highway Account of the Highway Trust Fund for Federal-aid highways each fiscal year. The TAP provides funding for programs and projects defined as transportation alternatives, including on- and offroad pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvement activities, and environmental mitigation; recreational trail program projects; safe routes to school projects; and projects for planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways. |

The application of a set of strategies and programs designed to reduce demand for roadway travel, particularly single occupant vehicle trips, through various means (e.g. education, outreach, marketing, incentives, technology). The strategies aim to affect when, where and how much people travel in order to make more efficient use of Transportation transportation infrastructure and services. Strategies include offering demand other modes of travel such as walking, bicycling, ride-sharing and management (TDM) vanpool programs, car sharing, alternative work hours, education such as individualized marketing, policies, regulations and other combinations of incentives and disincentives that are intended to reduce drive alone vehicle trips on the transportation network. Metro's TDM program is called the Regional Travel Options (RTO) program. See also Regional Travel Options Program. An urbanized area with a population over 200,000, as defined by the U.S. Census Bureau and designated by the Secretary of Transportation, or any additional area where TMA designation is requested by the Transportation Governor and the MPO and designated by the Secretary of Management Area Transportation. These areas must comply with special transportation (TMA) planning requirements regarding congestion management process, project selection, processes for development of tan RTP and MTIP and certification identified in 23 CFR 450.300-340. A mixed-use community or neighborhood designed to encourage transit use, bicycle and pedestrian activity, containing a rich mix of residential, retail, and workplaces in settings designed for bicycle and pedestrian convenience and transit accessibility. Metro began a regional Transit Oriented Development program in 1998 as part of a strategy to leverage the region's significant investment in high-capacity transit. As part of Metro's TOD Program, the agency strategically **Transit Oriented** invests to stimulate private development of higher-density, affordable Development and mixed-use projects near transit to help more people live, work and (TOD)/Metro Transit shop in neighborhoods served by high-quality transit. In addition, the Oriented Development program invests in "urban living infrastructure" like grocery stores and **Program** other amenities, provides technical assistance to communities and developers, and acquires and owns properties in transit-served areas and solicits proposals from qualified developers to create transitoriented communities in these places. To date, the TOD program investments totaling \$16 million have leveraged more than \$697 million in private development activity across 45 completed TOD projects. Oregon's statewide planning goals established state policies in 19 different areas. The TPR implements the Land Conservation and Development Commission's Planning Goal 12 (Transportation) which requires ODOT, MPOs, Counties and Cities, per OAR 660-012-0015 (2) **Transportation** and (3), to prepare a Transportation System Plan (TSP) to identify Planning Rule (TPR) transportation facilities and services to meet state, regional and local

| | needs, as well as the needs of the transportation disadvantaged and the needs for movement of goods and services to support planned industrial and commercial development, per OAR 660-012-0030(1). |
|---|--|
| | A common maccure of ready-even by multiplying miles treveled nor |
| Vehicle miles traveled (VMT) | A common measure of roadway use by multiplying miles traveled per vehicle by the total number of vehicles for a specified time period. For purposes of this definition, "vehicles" include automobiles, light trucks and other passenger vehicles used for the movement of people. The definition does not include buses, heavy trucks and other vehicles that involve commercial movement of goods. |
| Mitigation and Air Quality (CMAQ) | A federal source of funding for projects and activities that reduce congestion and improve air quality, both in regions not yet attaining federal air quality standards and those engaged in efforts to preserve their attainment status. |
| Administration (FTA) | U.S. Department of Transportation agency that provides financial and planning assistance to help plan, build and operate rail, bus and paratransit systems. The agency also assists in the development of local and regional traffic reduction programs. |
| | A vehicle carrying more than two passengers with the exception of motorcycles. |
| Progress in the 21st Century Act (MAP- | Reauthorization of Federal highway funding, signed into law by President Obama on July 6, 2012. Subsequent adoption of the FAST Act does not replace MAP-21 in all areas regulation of transportation safety planning and funding, so both must be referenced. |
| Transportation | The Oregon Transportation Commission is a five–member governor–appointed government agency that manages the state highways and other transportation in the state of Oregon, in conjunction with ODOT. |
| | A private motorized passenger vehicle carrrying one occupant (the driver only). Also referred to as a drive alone vehicle. |
| system | A set of strategies for increasing travel flow on existing facilities through improvements such as ramp metering, traffic signal synchronization, incident response and access management. |
| Department of Transportation | The federal cabinet-level agency with responsibility for highways, mass transit, aviation and ports; it is headed by the Secretary of Transportation. The DOT includes the Federal Highway Administration and the Federal Transit Administration, among others. |

If you picnic at Blue Lake or take your kids to the Oregon Zoo, enjoy symphonies at the Schnitz or auto shows at the convention center, put out your trash or drive your car – we've already crossed paths.

So, hello. We're Metro – nice to meet you.

In a metropolitan area as big as Portland, we can do a lot of things better together. Join us to help the region prepare for a happy, healthy future.

Stay in touch with news, stories, and things to do. oregonmetro.gov/news
